

LAZAR TECHNOLOGIES, INC.

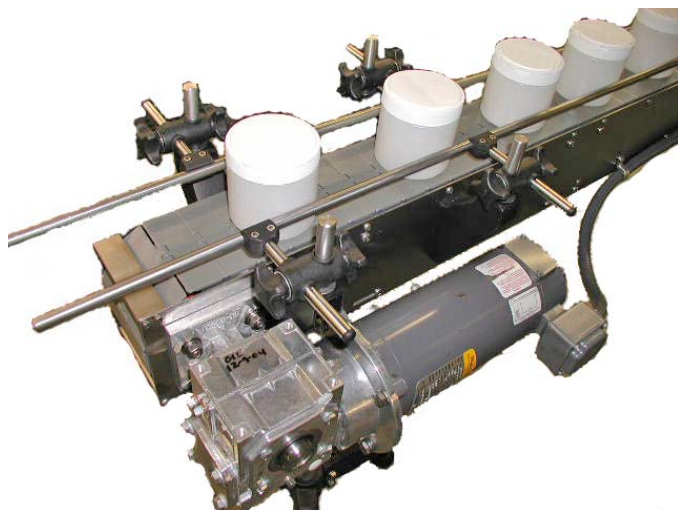

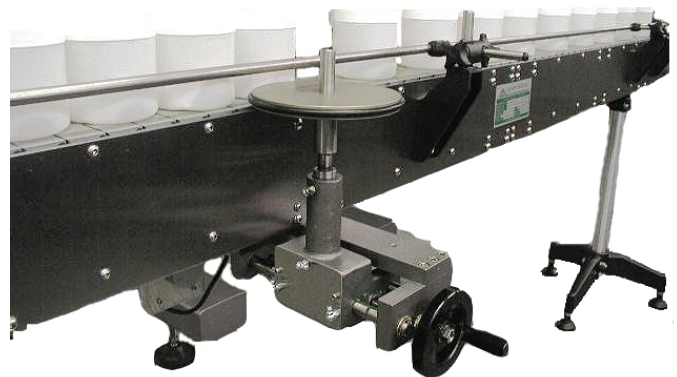

AUTOMATIC BOTTLE CAPPING EQUIPMENT

LCON Lazar Conveyor

The LCON (shown with Lazar Spacing Unit, LSU, on the left). Heavy duty construction, polished *304 stainless steel* sides and rails, reinforced polyamide (nylon) with stainless steel hardware brackets and tripod stands. *Delrin* table-top chain. Double railings are an available option.

Easy adjustable “No Tool” rails (single rails shown in all pictures). Standard conveyor chain widths are *3-1/4”*, *4-1/2”* or *6”*. Modular sections: for versatility, sections can be added from *6”* to *48”* inches (by *6”* section increments). Heavy duty bottle spacing unit with variable speed DC controls is an available option.

Standard drive can pull up to 60 feet of conveyor. Variable speed DC motor (*TEFC NEMA 4* shown on the right). This unit can be easily upgraded to *NEMA 4x* or *Wash-down* motors.
